## 4x4 GEAR

### X-TRAX

54X07

#### Basic Recovery

1. Use a shovel to clear enough area under wheel in the direction of recovery. Caution: Ensure vehicle is stable.

2. Place X-Trax II as far under that side of the wheel, against the tyre. Push the earth back under X-Trax II to ensure it is touching the tyre. Repeat for each bogged wheel.

3. Using Low Range, slowly drive off in the direction that you have prepared and laid the X-Trax II. At all times, avoid wheel spin on X-Trax II.

#### Deep Recovery

1. Jack up vehicle so bogged wheel is raised.

2. Pack as much earth as possible under wheel, lay down X-Trax II and place tyre on top of end furthest away from direction of travel. Repeat for each bogged wheel.

3. Using Low Range, slowly drive off in the direction that you have prepared and laid the X-Trax II. At all times, avoid wheel spin on X-Trax II.

#### Small Steps/River Beds

1. Move vehicle far enough back from oversized rock to allow safe work environment.

2. Unroll X-Trax II down the rock surface, some smaller rocks may be required for larger steps for ease of climbing.

3. Using Low Range, slowly drive off in the direction that you have prepared and laid the X-Trax II. At all times, avoid wheel spin on X-Trax II.

Once recovery is complete, grab the X-Trax II. Give them a little shake to remove any excess earth and fit them into their handy carry wrap for your next use.

#### Environment

Please take care in preserving the environment. Once vehicle is recovered, fill any holes and ensure the surroundings are safe for next vehicle and returned to original condition.
