

**BUSHRANGER**  
4x4 GEAR

## MAX AIR III

Permanently mounting your Max Air III Compressor

- If required, you can permanently mount your compressor using the four(4) brass centred grommets included in your kit.
- Remove the aluminium base tray and rubber suspension feet to release the mounting bracket holes.
- Place the brass centred grommets into the bracket holes.
- When direct wiring to a 12-volt power source, make sure comperssor is receiving full power. Up to 13.8 volts, the wire gauge can deliver 30 amps.
